1. School Information

1.1 School’s goals and missions

It has been unwaveringly our strong belief that through the Christian value of love, through teachers exemplifying such values in words and in deed, and through close cooperation with parents, our students can be nurtured in the six domains, namely ethics, intellect, physique, social skills, aesthetics, and spiritual growth. It is hoped that with an all-round education, each Shatin Tsung-Tsiner will acquire the following traits and abilities with which they can develop themselves and contribute to society.

**Traits**
- Self-disciplined
- Thoughtful
- Trustworthy
- Self-motivated
- Willing to Serve

**Abilities**
- Communication Skills
- Problem-solving Skills
- Self-learning Skills
1.2 Progress report

Over the last academic year, we continued to work tirelessly towards the goal of creating a population of Shatin Tsung-Tsiners who share our long-held beliefs and possess the qualities expected of them. Our internal and external efforts bore fruits and were confirmed by various types of year-end evaluation conducted across departments and levels.

In developing students’ various abilities, teachers and students alike were also heartened by the noticeable improvement in students’ academic results, following years of our teaching staff members’ effort as regards the introduction of new curricula (e.g. Thinking Skills, Arts-in-Life, Technology), the enhancement of teaching pedagogy (e.g. lesson study, collaborative teaching, Mentorship Scheme for new teachers, etc.) and the provision of elite classes (e.g. English, Chinese, Mathematics and Science courses for exceptionally gifted students) as well as remedial classes (e.g. the Nourishment Class, Junior Form Remedial Class and small-class teaching).

As far as the New Senior Secondary Education was concerned, the Academic Affairs Committee had been working over three years towards the successfully-completed task of drafting various subject combinations for the New Senior Secondary curriculum. This was the result of a widespread consultation with the teachers concerned, as well as many in-depth explanations and discussions during special meetings with parents of those stakeholder classes. Career planning was introduced to all junior form classes last year to help them prepare for the NSS changes. At the same time, the Student Support Committee had spent two years sketching the ‘Other Learning Experiences’ part of the NSS curriculum for the purpose of helping with students’ all-round development in such domains as Moral & Civic Education, Community Service, Careen-related Experiences, Aesthetic & Physical Development. (Refer to Section 4.3 Teaching and Learning for details about the development of Shatin Tsung-Tsiners’ abilities.)

On the other hand, we never ceased helping our students implement the ideals expected of a Shatin Tsung-Tsiner, as we were deeply convinced that only by loving oneself and others would human qualities be elevated. We expected that our Shatin Tsung-Tsiners could have their minds grounded in the spirit of Benevolence and have their life guided and shaped by the Christian values of Faith, Hope and Love. On top of a series of activities organized by various committees, teachers continued to impart their life experiences regarding how to develop and realize various life ideals through sharing in the morning assemblies and through the publication of ‘Messages to Shatin Tsung-Tsiners’. We also encouraged our students to take an active part in voluntary services to experience love delivered not just in words, but also in deed. For this just cause, we continued to provide junior form classes with a life education camp was held at the beginning of the school to help S1 students learn how to set life education course, and the compilation of a similar course for S4 was under way. In addition, a 3-day life education camp was held at the beginning of the school to help S1 students learn how to set goals and how to orient their efforts towards the goals. The camp has proven to be effective with good acclaims. (Refer to Section 4 for details about the nurturing of Shatin Tsung-Tsiners’ qualities.)

Regarding the new school premises, since our successful application for re-provision on Ma On Shan Railway Tai Wai Maintenance Centre in April, 2007, the school has been working closely with the Education Bureau, the MTR Corporation Limited alongside the property developer Cheung Kong (Holdings) Limited with lots of exchange of ideas as to the new school’s design and the facilities that suit our school’s future development needs most. The construction of the new school premises started in mid 2009 and is well under way. The new school premises will feature:

- a total of 35 standard classrooms (fitted with lockers)
- 3 basketball courts (with a mini football pitch and a handball pitch), 2 volleyball courts, 2 badminton courts (inside the large assembly hall), 3 running tracks, a table-tennis corner and a fitness room
- a drawing-board Shatin Tsung Tsin Science Park (probably including such technologies as wind power and solar power, an orchid, a science corner, a greenhouse and biological technologies)
- 4 technology rooms (a computer laboratory, a computer-aided learning room, a language laboratory, an art technology room) and a campus studio

Externally, the school was again commissioned by various departments of the EDB to conduct training at teaching and learning level, like Mentorship Scheme for new teachers. Over the last academic year, the QEF-funded project, namely the “IT-mediated Multi-Media Virtual Campus” was successfully implemented and a successful grant of some 500,000 dollars was secured from the EDB for the purpose of creating a better English-learning atmosphere and thereby raising students’ English proficiency.

Facing a new start, our school will not remit its past effort towards grooming our students into useful social members by making further stride in the areas covering lesson study, life education, character education and the nurturing of students’ integrity. As the verses in Psalm 127 go, “Unless the LORD builds the house, its builders labor in vain. Unless the LORD watches over the city, the watchmen stand guard in vain.” It is hoped that more blessing can be bestowed on STTSS in its effort to nurture talents under the constant protection and watch of our Heavenly Father.

4. Major Concerns And Support Measures in Different Departments

4.1 Management and organization

4.1.1 The major areas of concern

- Over the years, our teachers have been overburdened with teaching and administrative duties which denied them time for deeper thinking and personal growth. To redress such an imbalance, the school successfully recruited four administrative assistants who took up the tedious duties like collecting reply slips, serving as substitute teachers, being on-duty after school and handling other administrative work. Former graduates were also employed as the exam invigilators to free up precious teachers’ time. In addition, several assistant coaches for the dancing team, the music classes and other school sports teams were sought to provide subject teachers with additional assistance. To make sure there was reasonably adequate time for regular teachers to develop the NSS curricula and to practise collaborative teaching, part-time teachers were recruited to take care of some elite and remedial classes and six additional teachers were added to the staff list to help share the teaching duties.

- Last year, there was a lot of deep discussion, wide consultation and close contact between the school’s working group (for the new premises) and the EDB, the MTR Corporation Limited and the property developer Cheung Kong (Holdings) Limited over the matters regarding the new school’s look, colour, interior design and the construction materials. There was fruitful exchange of opinions and thus good progress. The construction work has started since May, 2009 and has been gathering momentum.

4.1.2 Support measures for addressing those concerns

- The Incorporated Management Committee of our school was composed of twelve members (one parent, one Alumni Association representative member and one teacher representative) drawn from different professional sectors like education, social service, legal profession, commerce, medicine, evangelistic groups and so on. Their role was to offer appropriate and professional advice on important school matters.

- The School Advisory Council, formed by the Principal, the Vice-principals, seven committee heads and three elected representatives from the community, conducted regular meetings as it saw fit to discuss matters related to the school policies.

- All twelve committees (e.g. the Academic Affairs Committee, the Student Support Committee, the Religious Affairs Committee, the Student Guidance Committee, etc.) implemented measures enabling students’ development in the domains of ethics, intellect, physique, social skills, aesthetics, and spiritual growth, with end-of-term evaluation of the effectiveness of those measures and submission of proposals for future development.

- Four General Staff Meetings were held to discuss school matters.

- To strengthen hierarchical communication, the Principal met all teachers, whereas the Vice-principals met all newly-appointed committee chairpersons and panel heads according to a regular schedule. In fact in June every year, teachers can submit their opinions in writing to ensure there is two-way communication flow.

- Each department conducted its own homework inspection according to its own schedule.

- The Academic Affairs Committee conducted value-addedness analysis following each public examination.

- Copies of questionnaire for various stakeholders (the one provided by the Quality Assurance Division of EDB) were distributed and completed by teachers, parents and students at the end of the term to assess examination.

- Each department conducted its own homework inspection according to its own schedule.

- The School Advisory Council, formed by the Principal, the Vice-principals, seven committee heads and three elected representatives from the community, conducted regular meetings as it saw fit to discuss matters related to the school policies.

4.1.3 Other support measures

Their role was to offer appropriate and professional advice on important school matters.

4.2. Professional development for the Principal and teachers

4.2.1 The major areas of concern

- Advancing teaching and learning quality

- Promoting healthy and balanced lifestyles and boosting the team spirit

4.2.2 Support measures for addressing those concerns

- To enhance the teaching and learning effectiveness, we persisted in carrying on with the Mentorship Scheme so that new teachers’ adaptation could be followed closely by senior staff members with mutual gains. Also, we provided sharing sessions for teachers to share their pedagogical knowledge and personal practices on teaching with a view to enhancing teaching effectiveness. The long-time practice of collaborative teaching did play a great role in advancing teaching quality and raising learning effectiveness.

- To raise teachers’ concern about the importance of a healthy and more balanced lifestyle and to foster better team spirit, two QEF-funded workshops entitled ‘Integration of Body & Soul: Management of Teachers’ Health Related Physical Fitness’ and ‘Team-building’, hosted by Professor Lam Man Ping from Humanistic T & T Institute, were arranged. These workshops on team building and physical fitness received an approval rating of as high as 90%. At an earlier time, we invited Rev. Lee Ching Chee to deliver a talk on ‘How to Stay Young’.

4.2.3 Other activities

- The Principal over the last year completed 195 hours of professional development, and was frequently invited to host training courses at various tertiary institutions and be the guest speaker on the Staff Development Days at fellow schools to share on our school’s success experience.

- Our teachers were willing to collaborate with their counterparts in other schools to benefit from exchange of ideas and experience. Take for example, themes covered during the academic interfaced included ‘Training for the Middle Management’, ‘Liberal Studies’, ‘Assessment for Learning’, ‘Curriculum Reform’, ‘Mentorship Scheme’, ‘Student Support’, etc.

- Our teachers actively enrolled themselves in various kinds of professional development courses or programs in preparation for the NSS challenge, and achieved an average of 62 hours of training in various fields. At the same time, all teachers attended the Joint Staff Development Day organized by the Tsung Tsin Mission of Hong Kong to learn more about the development of the school’s sponsoring body and its missions.

4.3 Teaching and learning

4.3.1 The major areas of concern

- Honing students’ problem-solving and self-learning skills
- Raising students’ communication skills

4.3.2 Support measures for addressing those concerns

- To hone students’ problem-solving and self-learning skills, subject teachers had been trying to give due emphasis on the development of critical thinking skills in curriculum content, teaching pedagogies, homework, and assessments. Liberal Studies and Thinking Skills was made a subject in its own right for S1-S3 to provide students systematic and explicit teaching of problem-solving and explicit teaching of thinking and self-learning skills and the opportunities to apply those skills in real sense. Apart from all these, different departments were trying to get aligned with the Liberal Studies and Thinking Skills subject with a view to incorporating thinking skills into students’ learning. These aside, debating courses were launched by both the Chinese and the English Department to provide S3 and S4 students with a practice platform to hone their debating skills. To move towards students’ Reflective Learning, which required every junior form student to summarize key learning points and identify areas requiring elaboration after the lesson, was practised in subjects like Arts-in-Life and Liberal Studies and Thinking Skills. Besides, we had in place a widely-acclaimed practice of ‘Pre-Lesson Preparation’ which required teachers to assign preparatory work to students in advance of the next lesson so as to enhance learning effectiveness. Lastly, all junior form students were required to complete a total of six project-based assignments within a period of three years in Integrated Science, Technology, Arts-in-Life, Liberal Studies and Thinking Skills so that enough training opportunities for the target skills could be secured.

- In a bid to improve students’ communication skills, Afternoon Reading Scheme (a 20-minute period administered immediately after lunch hours) and the Junior Form Reading Award Scheme were implemented to help students form a regular habit of reading. The schemes proved to be very effective. Apart from this, through the Extensive Reading Scheme (for Chinese and English) and the organization of the Writers’ Seminar, students’ interest in reading was reinforced and their ability to read enhanced. The Chinese Department went further to hold Creative Writing Classes and organize students’ writing groups so as to promote students’ writing competence. The use of Putonghua as the medium of instruction in the Chinese lessons were extended to S3 with unquestioned benefits accorded to students. To advance students’ English proficiency, the English Week, movie appreciation, games and conversation booths, song dedication and writing letters to the editor (over one hundred pieces of student’s work were published) were arranged to provide students with even more opportunities to improve their listening, speaking, and writing abilities. Aiding also the enhanced English ethos last year was the practice of having senior form students share their life experiences in English in the morning assemblies and this was very well received. At the same time, various S1 bridging and all-level enhancement courses were also offered to create better English ethos and thus uplift students’ English competencies. Apart from these, drama elements were incorporated into the S1 Arts-in-Life and the English curriculum to hone students’ communication skills, while the curricula for Liberal Studies and Thinking Skills, Arts-in-Life and Technology were adjusted to drill on students’ presentation skills through project-based learning. Teachers in Liberal Studies and Thinking Skills and the Chinese Language have compiled teaching notes on presentation skills and group discussion for long-term reference, too. As regards the extra-curricular activities, our Chinese and English teachers put forth great effort in training students for the HK Schools Speech Festival to raise students’ expressive power and the results were encouraging (Hong Kong refer to Section 5 for details about inter-school competitions).

4.3.3 Curricula

- At junior levels, there were curricula in the languages subjects (Chinese, English, and PTH), Mathematics and Science subjects, Humanities, Arts-in-Life, Life Education, P.E. and Christian Education. Curricula at senior levels included a mixture of both science and arts subjects with other electives as well. The NSS curricula were also in place to speed up the move towards students’ all-round development. It was hoped that students could enroll themselves in courses of their liking and thus develop their talents to the fullest extent.

- Small class teaching was implemented in junior forms to cater for learners’ differences. In the middle of the school year, additional remedial classes, namely the Nourishment Class and the Junior Form Remedial Class, were launched to provide timely help for students with various learning needs.

- To develop students’ potentials, Mathematics Enhancement Classes, Mathematic Olympiad Classes, Science Elite Classes and the Chinese and English Debating Classes were launched and offered to exceptionally gifted students. Externally, 29 students participated in the Support Measures for the Exceptionally Gifted Students offered by the Hong Kong Academy for Gifted Education, 16 took part in the on-line learning courses provided by the EDB, 5 joined the summer programs for the gifted and talented (engineering and dentistry) offered by the University of Hong Kong, 2 signed up for the Science Enrichment Programme administered by the Chinese University of Hong Kong, while 1 took up a basic programming enrichment course at the Hong Kong University of Science and Technology. Apart from these, the school encouraged our gifted students to sit for the International Assessments for Schools (refer to Section 5.15 for details about their performance). A figure little short of 900 headcounts were registered across all courses as such with pleasing results.

- To enhance teaching efficiency, the practice of collaborative teaching continued on the basis of the blueprint developed by the Chinese Department, covering the formulation of the course boundaries, division of labor in lesson preparation, collective discussion, lesson plan revision, mutual class observation and reflection in the teaching process. Over the last year, cross-curricular class observation was entertained to allow a widening of teachers’ perspectives. The practice of collaborative teaching entered its sixth year of implementation and all departments were able to achieve the goals set out at the beginning.

- To supervise and assess students’ learning, the school adopted various approaches like conducting surveys and interviews to get a better understanding of students’ learning progress on top of the regular reviews and evaluations conducted at departmental levels.

- To make sure students could lead a balanced lifestyle, students at junior levels were not supposed to spend over two hours on their homework.

- To broaden students’ artistic perspectives, all juniors had to attend at least one concert or visit at least one arts exhibition. On top of that, they had to take part in one external competition or performance. Meanwhile, each junior had to take up one musical instrument and one sport / art throughout the three years.

- All students had to take part in the EDB-initiated School Physical Fitness Award Scheme and the Long-distance Testing Training.

4.4 Student support

4.4.1 The major area of concern

- Nurturing the traits expected of a Shatin Tsung-Tsiner

4.4.2 Support measures for addressing the concern

- To move towards the goal of nurturing among students traits a Shatin Tsung-Tsiner should possess, we put in place the Life Education Course, which was aligned with the Christian Education and designed to build students’ development in the four domains of ‘Personal and Health and Social’, ‘Career Planning’, and ‘Civic Duty/ National Identity.’ In designing the curriculum, form teachers were consulted over the lesson plans so that the curriculum was a product of collective wisdom. The curriculum has been implemented for three years and proved to be effective.
• We held an S1 Life Education Camp on the theme of ‘Freshmen@STTSS: Dream’ with overwhelming responses from the student participants whose awareness of the importance of goal-setting was heightened. Also benefiting from the camp were those S6 student helpers (serving as group leaders) who expressed that they had not merely learned how to take care of their fellow juniors, but also had realized the importance of providing a good model, had felt the reciprocal love and care from their junior counterparts, had reflected upon their own goals and directions, had felt the joy in consequence of a sight of growth of life and so on. The three-day camp witnessed a full display of a Shatin Tsung-Tsiner’s traits by those S6 seniors.

4.4.3 Other activities
• A seminar on ‘Effective Planning for Your Matriculation Life’ was run in conjunction with the Career Guidance Committee to guide S6 students in their endeavors to plan their matriculation life and to brace for the accompanying challenges. The seminar was well received.

4.4.2 Support measures for addressing the concern
• All students filled out a questionnaire on the goals intended for them by the Student Support Committee. The survey findings, when compared with the similar statistics administered over the last three years, showed generally positive responses. This bears a strong testimony to the effectiveness of the support measures concerned.

4.4.1 The major area of concern

4.5 Student guidance and discipline
4.5.1 The major area of concern
• Nurturing the traits expected of a Shatin Tsung-Tsiner

4.5.2 Support measures for addressing the concern
• To create a student population manifesting the Shatin Tsung-Tsiners’ qualities of being trustworthy and willing to serve, we welcomed the EDB-initiated Integrated Education Scheme so that our students could have the opportunities to learn how to accept others’ deficiencies that arose for no fault of their own. Students were encouraged to commit themselves to serving others by actively engaging themselves in activities like flag selling, charity sales, SU community Service Scheme (for children and the weaker social groups), fund-raising activities for the reconstruction work entailed by the Sichuan earthquake, etc. The school has also recently received the Gold Award for Volunteer Service from the Social Welfare Department under the Volunteer Movement.

4.5.3 Other activities
• The Strive-for-excellence Award Scheme, meant to elevate students’ esteem and help students develop their growth potential, was promoted.

4.6 Extra-curricular activities
4.6.1 The major area of concern
• Nurturing the traits expected of a Shatin Tsung-Tsiner

4.6.2 Support measures for addressing the concern
• Through the One-student-one-art/sport Scheme, students were encouraged to take part in a wide range of interest group activities. Also, the all-inclusive STTSS Award remained the main source of motivation for students to participate in class-based or inter-class activities. Students were also encouraged to involve themselves in various music performances, dancing competitions and the like. The Blood Donation Day offered students opportunities to extend their thought, love, help and care for others, thus exemplifying the trait of ‘being willing to serve’ desired of a Shatin Tsung-Tsiner.

4.6.3. Other activities
• To encourage students to involve themselves actively in extra-curricular activities, a total of sixty-one interest groups as well as twenty-three school teams were offered.

4.7 Students’ Union
• A wide range of activities held last year were as follows: Inter-house Football Match, S1 Orientation Party, ‘Happy Share-Snapshot Appreciation’, a fund-raising activity entitled ‘Warmth for Sichuan: One scarf one student’, ‘Shatin Tsung-Tsiner Family’ (SS), ‘Dodge Ball Club’, ‘Our family’ (S2), ‘Ultimate Duel for the Smartest’ (S3), Stationery Crazy Sales (twice), a singing contest, and the Dress Casual Day.

• Various kinds of student services and welfare offered were as the following: stationery sales (at below-market price levels), sales of exercise books, photocopying services (free on the HKCEE Results Release Day), binding services, loans of various types of ball and chess games, umbrella and phones, provision of distilled water coolers on the covered playground, sales of school activity CDs, plastic card holders, environmentally-friendly bags, hand warmers, WE paper fans, tissue papers, locks, socks, sock glue, hair clips, rubber bands, towels, etc.

• As far as school amenities and services are concerned, money was apportioned for the sanitization of all classrooms, the improvement of facilities and services.

• As far as school amenities and services are concerned, money was apportioned for the sanitization of all classrooms, the improvement of facilities and services.

• To assess the effectiveness of the work done by the SU, a survey on students’ opinions in this regard was conducted through the use of questionnaire.

• To offer students the opportunity to display the traits required of them, the Dress Casual Day was held to raise funds for the Sichuan earthquake victims and the reconstruction work it entailed.
4.8 Religious activities

4.8.1 The major areas of concern

• Stepping up effort to preach the Gospel
• Nurturing the traits expected of a Shatin Tsung-Tsiner

4.8.2 Support measures for addressing those concerns

• Gospel sharing was integrated into the morning and hall assemblies. The yearly Gospel Week, the Gospel Camp for seniors remained the best harvesting time. Our school also embarked on the task of ploughing through our commitment to the Evangelistic Sports Program.

4.8.3 Other activities

• Christian fellowship, leadership training and lunch-time devotion groups were activated to facilitate students’ spiritual growth.
• Retreats, prayer meetings and teacher fellowship were organized to promote spiritual growth and mutual assistance through sharing among the colleagues.

4.9 Home-school communication

4.9.1. The major areas of concern

• Encouraging students to plan ahead
• Promoting home-school communication

4.9.2. Support measures for addressing those concerns

• To align with the development needs of the New Senior Secondary Education, the PTA arranged a symposium on the NSS in which parents of junior-formers were invited to engage themselves in an opinion interfloow with the Academic Affairs Committee over matters mainly related to the ‘Other Learning Experiences’ requirements under the new system. Besides, a ‘Mini Career Expo’ was organized jointly with the Career Guidance Committee for S3 students, with some 10 parents invited to share their work experiences in different professions with students.

• To maintain effective contact between parents and the school, the PTA continued with programmes that contributed to the forging of a better home-school cooperation culture. Such programmes include ‘Meeting Parents of First-formers’ and ‘New Student Orientation Day’ which were organized with a view to letting parents develop a better understanding of what the school expected of them and their kids. The PTA also invited the Principal and the Vice-principals to attend an open school policy forum and to host the discussion session of the PTA regular meeting, where it was active in having opinion exchange over school matters. To maximize parental involvement in their kids’ academic performance, the PTA made arrangements requiring parents to pick up their kids’ school reports on the Parents’ Day after the first-term examination. In addition, school committee heads and form teachers were invited on the Parents’ Day to hold various seminars and symposia (on themes like ‘How to help S1 kids cope with exams’, ‘Guidance on subject selection for S4 students’, ‘Criteria for S6 entry and S5 repeat’) for parents with kids studying at different levels so as to enable them to offer study advice appropriate for their kids. Moreover, home-school communication can be further strengthened through the publication of ‘Tips for Parents of First-formers’, ‘Bulletin for Parents’, ‘Newsletters for Parents and the Parent Basic Law’. Lastly, to secure better home-school contact, not only did the ‘Gas Station for Shatin Tsung-Tsiners’ provide a hotline and a ‘Friends of mail’ link, lunchtime ‘Parents Prayer Meeting’ was also maintained to extend the home-school cooperation.

4.9.3 Other activities

• Simultaneously, parent-kid activities and interest classes were held to forge better parent-kid relationship and they included the following: ‘Bean Curd Cheese Cake Class’, a New Year’s Day picnic, ‘Narcissus Planting Class’, ‘Rice Dumpling Class’, etc. The PTA members also volunteered to serve as time keepers on the Sports Day.

• The school social worker organized educational programmes on parental duties like ‘09 Talk and Share’ cell groups for parents in hopes of facilitating parents’ sharing of their experience in raising and nurturing kids.

• The PTA increased resources for more scholarships in order to provide students with greater incentives for pursuit of excellence and constant betterment.

4.10 Activities involving alumna/alumni

• To strengthen the ties with the alummi, Career and Studies Counselling Day was organized by the Alumni Association in conjunction with the Career Guidance Committee. Former students were invited to attend the Sports Day to forge stronger bonds and friendship with their junior counterparts.

• To strengthen alummi’s and alumna’s ties to the school and among one another, and to forge a stronger sense of belonging to the school, the Alumni Association arranged an annual general meeting, published the magazine PUG, constructed the homepage and assisted in hosting friendly football matches and relay events (on the Sports Day) involving teachers, students and alumni/alumna.

4.11 Buildings and grounds

• Replacing the computers in the Computer-Aided Instruction Room and the video projectors in some classrooms
• Fitting classrooms with visualisers
• Embellishing the campus with aggressive planting work
• Face-lifting the toilets on the ground and the fourth floor
• Replacing all blinds in the school

4.12 Student welfare

• Setting up and channeling internal and external scholarships and other assistance schemes

• Vetting candidates nominated for the Outstanding Student Award and various academic exchange programmes

• Simultaneously, parent-kid activities and interest classes were held to forge better parent-kid relationship and they included the following: ‘Bean Curd Cheese Cake Class’, a New Year’s Day picnic, ‘Narcissus Planting Class’, ‘Rice Dumpling Class’, etc. The PTA members also volunteered to serve as time keepers on the Sports Day.

• To strengthen the ties with the alummi, Career and Studies Counselling Day was organized by the Alumni Association in conjunction with the Career Guidance Committee. Former students were invited to attend the Sports Day to forge stronger bonds and friendship with their junior counterparts.

• To strengthen alummi’s and alumna’s ties to the school and among one another, and to forge a stronger sense of belonging to the school, the Alumni Association arranged an annual general meeting, published the magazine PUG, constructed the homepage and assisted in hosting friendly football matches and relay events (on the Sports Day) involving teachers, students and alumni/alumna.

• To further develop students’ leadership skills, the committee members of the Students’ Union underwent a two-day leadership training camp covering mainly on skills involved in procedure planning and target audience awareness. The External Vice-chairperson of the SU also took part in a course titled ‘Basic Certificate Course for Chairpersons of Students’ Union’ held by the Hong Kong Federation of Youth Groups.

• To maintain effective contact between parents and the school, the PTA continued with programmes that contributed to the forging of a better home-school cooperation culture. Such programmes included ‘Meeting Parents of First-formers’ and ‘New Student Orientation Day’ which were organized with a view to letting parents develop a better understanding of what the school expected of them and their kids. The PTA also invited the Principal and the Vice-principals to attend an open school policy forum and to host the discussion session of the PTA regular meeting, where it was active in having opinion exchange over school matters. To maximize parental involvement in their kids’ academic performance, the PTA made arrangements requiring parents to pick up their kids’ school reports on the Parents’ Day after the first-term examination. In addition, school committee heads and form teachers were invited on the Parents’ Day to hold various seminars and symposia (on themes like ‘How to help S1 kids cope with exams’, ‘Guidance on subject selection for S4 students’, ‘Criteria for S6 entry and S5 repeat’) for parents with kids studying at different levels so as to enable them to offer study advice appropriate for their kids. Moreover, home-school communication can be further strengthened through the publication of ‘Tips for Parents of First-formers’, ‘Bulletin for Parents’, ‘Newsletters for Parents and the Parent Basic Law’. Lastly, to secure better home-school contact, not only did the ‘Gas Station for Shatin Tsung-Tsiners’ provide a hotline and a ‘Friends of mail’ link, lunchtime ‘Parents Prayer Meeting’ was also maintained to extend the home-school cooperation.

• To align with the development needs of the New Senior Secondary Education, the PTA arranged a symposium on the NSS in which parents of junior-formers were invited to engage themselves in an opinion interfloow with the Academic Affairs Committee over matters mainly related to the ‘Other Learning Experiences’ requirements under the new system. Besides, a ‘Mini Career Expo’ was organized jointly with the Career Guidance Committee for S3 students, with some 10 parents invited to share their work experiences in different professions with students.

4.1.1 關注事項

- 為老師創造空間以回應教育改革
- 為遷校工作作準備

4.1.2 為配合關注事項而推行的活動 / 計劃

- 近年老師工作日益沉重，思考及發展空間不足。為改善這情況，本校將於過去一年，聘請四位教育行政助理負責收回條、代課及課後當值等行政工作，並邀請畢業同學負責監考，又聘請舞蹈、音樂、球類助教等以分擔老師的工作。此外，本校又聘請兼職老師進行拔尖補課工作，並聘請六位老師以分擔同工的教學工作，讓本校同工有空間準備新高中課程及進行協作教學。

- 在過去一年，本校遷校工作小組與教育局、港鐵及發展商長江實業有緊密而深入的接觸及討論，並就新校舍的外型、顏色、內部設計、用料等交換意見，進展順利，而新校舍已於本年五月動工興建，進度理想。
4.1 其他措施

- 本校之校董會，成員共十二名（其中三人分別為家長、校友及老師代表），他們均為專業人士，分別來自教育、社會服務、法律、商業、醫療及宗教等不同界別，為校董會提供適切而專業的意見。

- 各委員會（如：學生、學生教育、宗教、輔導等共十二個）落實執行德、智慧、體、群、美、靈六育的發展，各會在年終進行檢討，評估成效並提交來年的計劃書。
- 各學科科務由科主任監察，並透過科務會議制訂教學策略，因應需要修訂課程及教學進度。同時，在年終進行檢討，評估成效並提交來年的計劃書。
- 每年舉行四次全體教師會議，商討校務。
- 為加強溝通，校長會按時接見所有老師，而副校長會按需要接見新任的委員會主席及科主任；又每年的六月，每位老師均可填寫意見書表達意見。
- 各科每年均進行課業審視。
- 學務委員會就學科於公開試表現進行增值研究。
- 每年年終本校均會派發教育局質素保証組「持分者問卷」，供老師、學生及家長填寫，以評估學校發展狀況。
